Curriculum Overview 2024 to 2026

Subject	A Level Business	Year group	12
<b>Vision statement:</b>	<p>At Landau Forte our curriculum exists to ensure all students regardless of background and ability have the opportunity to unlock their potential. We are committed to students being challenged from their previous key stage learning experiences. Our broad and balanced curriculum is ambitious, coherently planned and sequenced, and will provide the platform for preparing students with the foundations for examination success.</p> <p>Our Curriculum Intent has been informed by a wide variety of researchers and is steeped in evidence based research. Christine Counsell summarises the aspiration of our curriculum to empower all learners creating a pathway to success in university, their career and life:</p> <p><i>‘A curriculum exists to change the pupil, to give the pupil new power. One acid test for a curriculum is whether it enables even lower attaining or disadvantaged pupils to clamber into the discourse and practices of educated people, so that they gain powers of the powerful.’</i></p> <p>As well as excellent academic success we aim to ensure our students leave us as polite and well-rounded young adults. Our new core values of Compassion, Courage and Curiosity are currently being embedded throughout our curriculum offer to ensure we continue to meet our social, emotional, spiritual and moral obligations.</p>		
<b>Curriculum intent:</b>	<p><b>“The road to success is always under construction.” Lily Tomlin</b></p> <p>Business has an impact on all our lives and shapes us as citizens. How we live our everyday lives is determined by business and affects our standard of living, our health and wellbeing, our happiness and ultimately the local communities in which we live. The connection that business has with the futures of young people is very important and at some point in their lives, our diverse cohort of students will need to have the confidence, capability and aspiration to be able to develop economically as self-sufficient individuals. To be able to live ‘choice filled lives’ in a dynamic and rapidly advancing local, national and global economy.</p> <p>Our Business curriculum is delivered by subject experts and aims to provide all learners with a deep and powerful knowledge base of the world of business, which includes key concepts such as Enterprise, Finance, Promotion and Marketing, Human Resources, Business Structures, Operational Strategy and Growth. The study of Business should also develop our students beyond the school with specialist knowledge to equip them with the life skills that they will need to ensure access to future opportunities within a work environment which is complemented by an Academy wide careers education programme that augments classroom study and provides wider work experience opportunities.</p> <p>Our Business curriculum puts the subject in context through the use of real life situations, case studies and exposure to entrepreneurs in the business world and through problem solving scenarios, which will help students to develop compassion, curiosity and courage. We are passionate about building cross curricular links in other subject areas at our Academy to enable this transition into our KS4 and KS5 provision for our students. We regularly link our curriculum to current affairs, as well as to both local, national and global contexts to provide students with the wider understanding to be able to comprehend the world of business and to be able to succeed within it.</p> <p>Through our carefully planned curriculum, our students are exposed to opportunities to develop a wider understanding of a wide range of business concepts, to develop their ability to think critically, technically and creatively to demonstrate a strong and secure business acumen. They also develop an understanding of what it</p>		

## CURIOSITY

## COMPASSION

## COURAGE

means to be entrepreneurial and they are provided regular opportunities to apply this understanding to real life contexts and scenarios as part of whole Academy events.

Students should be equipped with a broader understanding of the technical, ethical and economic challenges that businesses face, in order to ensure that they have the knowledge, and confidence to adapt to the rapidly changing business environment.

Through a carefully designed curriculum, students develop skills and traits which are essential for success in the modern world:

- Critical thinking, an enquiring mind and a critical approach to their work
- Oracy through the ability to discuss, argue and express opinions
- Collaboration through research and group tasks including creating and sharing content
- Self-quizzing which supports the development of an analytical and enquiring mind
- Adaptability and the ability to respond in a timely manner
- Organisation and independence through project management

### Threshold Concepts (TCs):

**TC1: A great business student is able to extract and apply case study and real-world material** - theoretical concepts need to be specifically applied to the environment and context stipulated.

**TC2: A great business student understands the concept of strategy and that all decision-making is to reach an end goal** - students are fully aware that strategy is constantly changing in a fast moving business environment and that all business decisions will have an impact on the success of an organisation.

**TC3: A great business student recognises and understands that there is interdependence within organisations and across global networks** - departments within a business are not separate but are interdependent on each other and the development of globalisation has led to a more integrated business world.

**TC4: A great business student understands how external influences have a significant impact on a business** - students must consider that factors outside of business control will impact the business, its actions and the further impact this may have on the wider business environment.

**TC5: A great business student understands the concept of profitability** - develop as enterprising individuals with the ability to think technically and creatively to demonstrate business acumen, and draw on evidence to make informed business decisions and solve business problems and apply quantitative skills relevant to business, including using and interpreting data.

### Specification Summary

The OCR A Level in Business will encourage learners to be inspired, motivated and challenged by following a broad, coherent, practical, satisfying and worthwhile course of study. It provides insight into, and experience of, how businesses work, stimulating learners' curiosity and encouraging them to engage with commerce in their everyday lives and to make informed choices about further study and about career choices. Each component includes synoptic assessment, so learners will have a holistic learning experience and be able to apply concepts to different situations. The aims of this specification are to encourage learners to:

- Develop a critical understanding of organisations and their ability to meet society's needs and wants
- Understand that business behaviour can be studied from a range of perspectives
- Generate enterprising and creative approaches to business opportunities, problems and issues
- Be aware of the ethical dilemmas and responsibilities faced by organisations and individuals

# COURAGE

<b>Sequencing:</b>	We have chosen to sequence the year 12 curriculum like this because students need the basic foundation of how a business is structured in order to link to this throughout the rest of the course, especially in terms of the industry that that operate in, their ownership structure and how they grow. Finance is a unit that students find really difficult and so we cover this in year 12 in order then to consistently revisit and retrieve key formulas and application throughout the rest of year 12 and into year 13. Strategy and objectives and then External Influences are taught for the next units as students are able to apply these units more easily to their understanding of the wider world and they are popular essay style questions in the end of course exams, which gives students plenty of opportunity to develop the exam skills needed. Each session within a unit covers a mini topic and includes a retrieval task, new learning and then an exam style question in order to support the consolidation into long term memory and offer the desirable difficulty.

# COURAGE

Our Business curriculum puts the subject in context through the use of real life situations, case studies and exposure to entrepreneurs in the business world and through problem solving scenarios, which will help students to develop compassion, curiosity and courage. We are passionate about building cross curricular links in other subject areas at our Academy to enable this transition into our KS4 and KS5 provision for our students. We regularly link our curriculum to current affairs, as well as to both local, national and global contexts to provide students with the wider understanding to be able to comprehend the world of business and to be able to succeed within it.

Through our carefully planned curriculum, our students are exposed to opportunities to develop a wider understanding of a wide range of business concepts, to develop their ability to think critically, technically and creatively to demonstrate a strong and secure business acumen. They also develop an understanding of what it means to be entrepreneurial and they are provided regular opportunities to apply this understanding to real life contexts and scenarios as part of whole Academy events.

Students should be equipped with a broader understanding of the technical, ethical and economic challenges that businesses face, in order to ensure that they have the knowledge, and confidence to adapt to the rapidly changing business environment.

Through a carefully designed curriculum, students develop skills and traits which are essential for success in the modern world:

- Critical thinking, an enquiring mind and a critical approach to their work
- Oracy through the ability to discuss, argue and express opinions
- Collaboration through research and group tasks including creating and sharing content
- Self-quizzing which supports the development of an analytical and enquiring mind
- Adaptability and the ability to respond in a timely manner
- Organisation and independence through project management

## Threshold Concepts (TCs):

**TC1: A great business student is able to extract and apply case study and real-world material** - theoretical concepts need to be specifically applied to the environment and context stipulated.

**TC2: A great business student understands the concept of strategy and that all decision-making is to reach an end goal** - students are fully aware that strategy is constantly changing in a fast moving business environment and that all business decisions will have an impact on the success of an organisation.

**TC3: A great business student recognises and understands that there is interdependence within organisations and across global networks** - departments within a business are not separate but are interdependent on each other and the development of globalisation has led to a more integrated business world.

**TC4: A great business student understands how external influences have a significant impact on a business** - students must consider that factors outside of business control will impact the business, its actions and the further impact this may have on the wider business environment.

**TC5: A great business student understands the concept of profitability** - develop as enterprising individuals with the ability to think technically and creatively to demonstrate business acumen, and draw on evidence to make informed business decisions and solve business problems and apply quantitative skills relevant to business, including using and interpreting data.

## COURAGE

	End of unit assessment- Morrisons (TC1, TC2, TC3, TC4, TC5)		-Evaluate the importance of logistics to BMW's operations (20) (TC1, TC2, TC3, TC4, TC4)			
<b>Key/Historical misconceptions in this unit:</b>	-The concept of organisational culture - Applying motivational theorists and change management models	-strategy considers the whole process of marketing (not just advertisement) -elastic vs inelastic	- Reading bar gate stock graphs - PERT formula - Interpreting GANNT charts - CPA - calculating EST, LFT, float time	- The concept of a logistics strategy -The factors considered as part of an operations strategy and how these come together		
<b>Sequencing:</b>	<b>We have chosen to sequence the year 13 curriculum like this because students can use the key units covered in year 12 to be able to apply their key knowledge from Year 12 and give a more strategic view of business opportunities, problems and issues. HR encompasses the employee perspective considering all the key functions already studied. Marketing is studied next and enables the students to link the concept that marketing helps facilitate exchanges between buyers and sellers for the mutual benefit of both parties. The operations unit considers the theme of production strategy but with a consideration for the financial position of a firm and the marketing mix they are implementing. Throughout year 13, there is a continued focus on local, national and global businesses enabling students to gain a full appreciation of the running of a business in a variety of contexts and therefore be able to answer synoptic exam style questions. Each session within a unit covers a mini topic and includes a retrieval task, new learning and then an exam style question in order to support the consolidation into long term memory and offer the desirable difficulty.</b>
